

Possibility Women's Lab in Poland

Reawaken the feminine connection to aliveness!

Since most of us grew up in a patriarchal environment dominated by the intellect, we have largely unlearned the female approach to aliveness. From the time we start school, the only thing that counts is: Doing - doing - doing. We have no practice at all in BEING. We don't know how to be effective out of our BEING - we label BEING as "laziness", because you don't get paid for BEING. At best, it is about BEING SOMEONE or SOMETHING. This imprint is stored deep in our cells. Bringing it to the surface and reconnecting with the BEING are important components of the Women's Lab. Here you can experience access to the archetypal feminine and to the magic of life, beyond the hectic and stress of the doing mode, and thus give the feminine form of aliveness in you more space and creative power again.

This Lab has a different pace!

We will go with the flow and really reconnect with the circle of women and BEING in relationship. With no agenda and no schedule, we move through different energetic spaces to always do exactly what comes next and practice the principle of emergence.

Welcome Home!

We will spend 4 days together. Here you will change your perspective on life, expand your capacity to love and consciously connect with the source of feminine BEING. In close dialogue it will become clear which group and individual processes are necessary to bring about transformation and healing for you personally and for the collective.

If you feel attracted by this extraordinary training and have already taken part in at least one, or better still two, mixed labs then decide to take part without knowing how it works. The best thing is to sign up right now.

Trainers: Patrizia Patz & Dagmar Thürnagel

The training will be held in English with Polish translation.

Registration: <https://possibilitymanagement.org/calendar/Q3E08E/2022-10-20/>
